

2018 DC Volcano Workshop

Meeting Date: **February 16, 2018**

Registration Deadline: **January 1, 2018**

Location: **NASA Goddard Space Flight Center, Greenbelt, MD**

Meeting Information

The 2018 DC regional volcanology workshop will be held at NASA Goddard Space Flight Center on Friday, 16 February 2018. This workshop will bring together members of the Earth and Planetary Sciences community who share a common interest in volcanology and related physical and chemical processes.

This workshop is hosted by volcanologists at NASA GSFC following last year's successful workshop hosted by Carnegie DTM.

Workshop Structure

The workshop is intended to be highly interactive and will include science talks by members of the DC volcanology community and periods for discussion and networking. The 1-day workshop will tentatively be run 9am-5pm. Attending the workshop is completely free, while lunch will be provided for ~\$10.

Registration

Geologists, geochemists, and geophysicists researching volcanic processes are encouraged to register and present some of their work. The registration deadline is January 1, 2018 to provide sufficient time to get visitor badges from all participants, foreign nationals and US citizens alike.

Register using the Google Form at this URL:
